EXPERIENCE

Freelance Web Developer

March 2025 – April 2025

Remote

- Collaborated directly with Dhaniram Paints to design and develop a fully responsive and modern company website using Next.js, JavaScript, Tailwind CSS, ShadCN, enhancing user experience and overall site performance.
- Integrated a product showcase and inquiry form to boost customer engagement and lead generation.
- Focused on mobile-first design, accessibility, SEO optimization, and performance enhancements for better user retention

Web Development Training Intern

June 2024 - July 2024

SLOG Solution PVT. LTD.

Dehradun, Uttarakhand

- Mastered HTML, CSS, and JavaScript fundamentals, along with Bootstrap for building responsive and visually appealing web layouts across multiple devices and screen sizes, ensuring optimal performance and user experience.
- Learned how to use and integrate APIs into web projects to fetch and display dynamic data efficiently.

Web Development Intern

July 2023 - August 2023

Cairo Vision

Bengaluru, Karnataka

- Created a high-performance website as a task assigned by the company, ensuring it met all project requirements, specifications, and was delivered within the given timeline, maintaining quality standards.
- Contributed to organizing team schedules and tasks, supporting timely delivery, smooth workflow, efficient communication, and maintaining overall team productivity.

PROJECTS

AI Mock Interview - Developed a browser-based mock interview platform using React, Tailwind CSS, and ShadCN, enabling users to simulate real interview experiences. Integrated webcam support for recording responses and Google Gemini AI for analyzing answers, generating feedback, and providing performance insights. Used Clerk for authentication and Firebase for storage, ensuring a seamless and secure experience. ([Link](#))

Zentry - Designed a modern website with scroll-triggered animations, geometric transitions, and video storytelling to deliver a responsive, interactive user experience. ([Link](#))

Concept Flow - Built a real-time collaboration platform using Next.js 14, Fabric.js, and Liveblocks, offering features like cursor chat, comments, reactions, and interactive drawing. ([Link](#))
